

 Chris Beckner,  
DDS

 3 Office Staff

 Fairfield, OH

 Since: 2019

Dr. Beckner was a Periodontist at a self-described mom and pop office for the last 30 years. He dreaded going into the office, taxed by monotony and the lack of advancement in treatment methods. He was trained to do surgeries: scalpels, big flaps, osseous recontouring, sutures, periopacks – all which lead to patient discomfort and career dissatisfaction. With Waterlase, Dr. Beckner had an injection of excitement with his new laser technology that causes less pain, and is a minimally invasive solution his patients love! As Dr. Beckner exclaims, “It’s nice getting to be the ‘hero’ for once.”

*“I’m so glad that my husband (and I) decided to invest in laser technology. He is actually excited about dentistry and has a voracious appetite to learn more.”*

— Kristen Beckner, RDH

*“For as long as I can remember, I was counting the days (years) until retirement. I would dread going into the office—Burned out.”*

*“Waterlase has enabled me to expand and improve on the approach we take to patient care...minimal bleeding, no sutures, no packing and unbelievably—minimal to no pain. It’s nice to be the “hero” for once! I no longer wake up counting the days to retirement.”*

— Dr. Chris Beckner
