

-  Kenneth Canzoneri, DDS
-  6 Office Staff
-  Arcadia, CA
-  Since: 2001

Integrating Waterlase® into his practice has allowed Dr. Canzoneri to perform procedures he would not have otherwise attempted. He now treats periodontal disease and inflammation in a more comprehensive and definitive way. Patient satisfaction has increased and his patients often request the laser for their procedures because of little-to-no anesthesia, reduced sensitivity, as well as hard and soft tissue conservation.

WATERLASE PROCEDURES

PERIODONTAL

RESTORATIVE

PERI-IMPLANT

COSMETIC

"I use the Waterlase everyday on almost every patient... procedures such as Class V composites, closed-flap crown lengthening, REPAIR surgery for periodontal disease, removal of smear layer prior to any bonding treatment, pre-impression troughing and more."

"It's the main practice-builder in my business."
