

Justin Kang,
DDS, MS, MPH

11 Office Staff

Franklin Lakes, NJ

Since: 2019

Case Study

Dr. Justin Kang experienced a production growth of more than 37% within just four months with Waterlase®. Even more amazing, he is now able to perform full-mouth, closed-flap periodontal surgery without the post-operative discomfort associated with traditional methods, which his patients fully appreciate. He's experiencing improved clinical results with a higher level of patient satisfaction, resulting in a 50% increase in referrals.

"Waterlase has resulted in increased patient acceptance to periodontal therapy, as well as improved clinical results and significantly reduced post-operative discomfort for the patient. Waterlase also allows for a more predictable approach to treatment and management of peri-implantitis."
