Clinical Documentation & Billing Guide

FOR THE FEE DATA

This fee information is for the individual dentist's personal use only. It is understood that this information is not to be used in any way to violate federal anti-trust laws, restrain trade laws, boycott or price-fix. The fee data represents 100% of the 90th percentile. The abbreviated code numbers and descriptors are not intended to be a comprehensive listing. Current Dental Terminology © American Dental Association. All rights reserved.

FOR THE ENTIRE WORK

No part of this work may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopying or any information storage and retrieval system, without written permission. Unauthorized reproduction, in whole or in part, is a violation of U.S. Copyright Law. The material presented is not to be construed as endorsed by any association or membership of organized dentistry, or affiliated with any teaching institution. Readers should consult their attorneys for legal counsel, as this material may not be construed as legal advice.

DISCLAIMER

The instructions given in this guide is meant to be a resource for billing specific procedures achieved with the use of a laser, and is not intended to provide hard-and-fast protocols for specific treatments.

Responsibility for the safe and ethical use of any dental laser, for patient care in general, and for the individual treatment concerns unique to each patient, rests with the health care provider who utilizes laser instruments within the scope of practice in the state in which he/she practices dentistry or dental hygiene.

Variations in treatment objectives particular to each individual circumstance may dictate modification of the protocols mentioned in this guide to best suit the needs of the patient being treated. The responsibility for the selection of a specific laser or specific protocol rests with each individual practitioner providing direct patient care.

The CDT code reimbursement fee ranges described in this manual are estimated and may vary by state and/or insurance provider.

Furthermore, it is the individual and sole responsibility of each health care provider to understand and comply with all state board regulations and any other state or national rules, regulations, or guidelines that govern or may restrict in any way the use of a laser by the clinician who provides care.
